Leaded, Stained, Painted Glass

Standard Features

- Lead came lights (came size 0.25)
- Cathedral glass (see www.spectrumglass.com/Stocklist.html for all glass types)
- Standard Geometric light/pane patterns
- 50% silver / 50% lead soldered – rebar supports as required
- Zinc frame (0.375-0.75”)
- Extensive crating for safe shipment (crating and shipping are extra charges w/o customer pickup)

Options

- Wider came (0.375” – 0.5”) or custom came profile
- Weather-proofing (putty) on one side or two sides
- Patina Aging for frame and lead came (bronze or black)
- External/Outside frame preparation – zinc tabs with pre-drilled screw holes
- Non-standard glass (including restoration and antique types) and bevels
- Edge panes (rectangular panes around perimeter of panel, see “Crest with Diamond” example below)
- Painted sections – professional lacquer glass paint used
- Wooden sash framing (paint-grade or stain-grade wood specie)

Standard Geometric Patterns

Diamond Rectangle

Non-Standard Examples:

Vermeer

Crest with Diamond

Double House

Gothic Top

SemiCircle

SemiCircle Rebar

Foiled top

Boxed

Boxed Complex

Your Pattern ???

Pricing

Standard geometric patterns (listed above) and non-complex other designs (suggested by designer/client) are normally ~~\$75~~ per square foot of panel surface. Standard option pricing is as follows: patina aging is included, wider came is ~~\$6~~ per square foot, weather-proofing is included, edge panes are ~~\$10~~ per linear foot of panel perimeter. External application zinc tabs are ~~\$40~~ extra.

Design only is possible (for 3rd party fabrication), and are drawn in CAD (to-scale). Typical design fees range between ~~\$25~~ – ~~50/hr~~.

Non-standard patterns are ~~\$95~~ per square foot for geometric shapes and ~~\$145~~ per square foot for custom designs.

If painted sections are imbedded into the geometric pattern, the painted section will be priced separately (per client's design), however, the painted area is still included in the overall square footage used to calculate the geometric "surround" price. This is due to the added complexity of embedding the painted section into the geometric pattern.

Application

Leaded Glass panels can be inserted within existing doors, windows (even double-hung), wall partitions, or can be used as the external glass/glazing. With double-hung windows, it is sometimes necessary to create a rabbit for the panel to slip into. Very exact measurements are required for accurate panel fit. The measurement should be provided exactly where the existing glass pane meets the wooden [window] frame. Panel weight can be a factor for historical window and door applications.

Lead Time

Lead time can vary due to potential order backlogs. Please inquire via phone or the email. Standard panels can be produced normally within 2-3 weeks with no order backlog.

Shipping

Via FedEx Home Delivery (to residential areas) - up to 70 pounds and measurements of length + girth cannot exceed 150" – or - FedEx Ground (business address) - up to 130 pounds and measurements of length + girth cannot exceed 165" . Initial shipping price quoted is only an estimate as the actual shipping cost is by final weight (which can vary depending on glass pane type and thickness, and panel size). Shipping price will be that of the actual shipping cost (including insurance) with crating charges typically costing ~~\$25-~~ ~~\$75-~~

Returns

Refer to the warrantee section for general return policy.

Manor Doors

Stuart Plank

Tudor Panel Half-Light

Stuart Double with Sidelight

Tudor Panel Double with Half-light

Tudor Panel with raised stops

Standard Features

- Solid Mahogany, White Oak, Walnut, and other fine hardwoods (no veneer) 36" x 80", 1.75" thick door (slab)
- Mortise and tenon traditional joinery
- Plank doors are beveled at plank joint
- Plank and Panel Designs from historical references (US Tudor Revival, European castles and manors)
- Panel doors with raised edge moulding, deep recess with raised panel or flat (your choice) and glass replacement of wooden panels at your choice
- Gothic arched, radius (half circle), and square top possible on all designs (all arched top doors are an upgrade from square top)

Options

- Extra thick (2", 2.25" or more) or custom height or width
- Tudor door frame/jamb (paint-grade or stain-grade with same wood specie as door) that includes jamb, threshold (oak adjustable riser, bronze aluminum sill), standard hinge square butt hardware, weather stripping (QLON 5/8" bronze kerf-type), and vinyl door sweep

- Other mortised hardware (lockset) can be mortised/prepped (see hardware section in this document).
- Nails or studs possible
- Surface finishing– includes oil staining and varnish topcoats
- Custom designs possible (submit the design for a custom quote)
- Windows added to panel or plank style doors where leaded glass and double insulated glass is possible (separately or together)
- Matching cast stone surrounds available that were engineered to fit Tudor doors

Standard Designs

Classic Plank

Jacobean Panel

Tudor Panel

Charles Panel

Henry VIII Panel

Stuart Plank

Stuart Plank, Tudor Sidelight

Tudor Panel, half-lighted, sidelight

Pricing

Standard door designs (listed above) are priced as follows (3'0" width, 6'8" height, 1.75" thickness):

Design	Mahogany (\$) *	Oak (\$) *
<i>Tudor Panel</i>	1890	2290
<i>Classic Plank</i>	2090	2590
<i>Stuart Plank</i>	2290	2790
<i>Jacobean Panel</i>	3490	3990
<i>Charles Panel</i>	3590	4190
<i>Henry VIII Panel</i>	3890	4390
<i>Stuart Plank, Tudor Sidelight</i>	4390	4890
<i>Tudor Panel, half- lighted, sidelight</i>	3990	4490

* not including jamb or other options or shipping cost

Options include: Plank door window additions with normal size speak-easy double-insulated glass, or leaded/stained glass is ~~\$250~~ with both possible (plus ~~\$100~~). Refer to the hardware section for hardware pricing. Frames/jambs - ~~\$900~~ for paint-grade and ~~\$1200~~ stain-grade (same wood specie as door), pre-hung (hardware prep, mortising and installation of hinges) is ~~\$250~~ (left or right hand operation must be specified), Extra thickness (2.25") is ~~\$400~~, strap hinge and door stud hardware installation is ~~\$0~~ (if hardware purchased from us), Staining and poly finishing is ~~\$450~~ (refer to stain chart in the next section for stain colors), lockset handling is ~~\$100~~, special mortise box mortising is ~~\$250~~, and custom height and/or width is ~~\$300~~ in either direction. Refer to cast stone section for door surround pricing. Custom door priced per design.

Application

Doors are sold as blanks and we will prep/install some hardware. We will mount strap hinges or other decorative hardware – hardware provided by the client or by us. Hardware can also be shipped loose and can also be performed by client's installer. We require all 6 sides of the door sealed thoroughly to retain warrantee. Extreme alterations in the door width or height (+96" for exsmple) will also invalidate warrantee. Very exact measurements are required (within 0.125" tolerance) for accurate door fit. The measurement should be provided exactly – within existing or proposed jamb. Door weight can be a factor for historical door jambs – jambs may need to be replaced. Extreme door exposure to direct sun and moisture can also invalidate the warrantee if finishes are not properly applied and maintained. It is always best to protect doors with a portico or overhang.

Lead Time

Lead time can vary due to potential order backlogs. Please inquire via phone or the website. Standard doors can be produced normally within 4-6 weeks when no extreme order backlog exists.

Shipping

Initial shipping price quoted is only an estimate as the actual shipping cost is by final weight (which can vary depending on complete door design). Shipping price will be that of the actual FedEx shipping cost (plus insurance) with \$200 crating charge typical.

Returns

Refer to the warrantee section for general return policy.

Stains

The following stains are oil-based and can be applied to any of our wood products - mostly are applicable to doors.

Heraldry Carvings and Glassworks

Standard Features

- Custom coat of arms executed in Stone, wood, or stained glass – creating a true family heirloom - unique in the world – to client’s specifications by world class artisans
- Stone and wood carving executed by hand by a nationally recognized professional artisan
- Authentic materials used – limestone, marble, walnut, oak, cathedral glass
- Glass coat of arms can be integrated into a larger panel (see example above) or can be made standalone to be used as a sun-catcher against an existing window.

Pricing

Pricing is per design for these custom artworks. The above top examples could be made again (or something very similar) – pricing depends of total size and complexity. Sample pricing:

Design Examples From Above	\$ Cost *
Coat of arms with horses (shown above) in Indiana Limestone 20” x 20”	3400
Coat of arms (large, shown above) in Painted and Leaded Glass 26” x 66”	3600
Coat of arms (standard, shown above with lions) in stone	2000
Coat of arms (custom, per your design) in stone	3500
Coat of arms (custom, per your design) in wood	3000

- not including shipping cost

Application

Stone carvings must be specified with precise dimensions of relief and size. Glass works must have exact dimensions to fit the desired window or door application. The design will be discussed via CAD drawings – with all aspects of the design (color, depth, subject, scale, writing style, etc) agreed to before work begins. We will perform some degree of research work to discover the coat of arms of an ancestor, or help with a new coat of arms design, otherwise. Custom coat of arms design (design only with 3rd party fabricator) is possible with cost ranging ~~\$200-600~~.

Lead Time

Lead time can vary due to potential order backlogs. Please inquire via phone or email. Because these are unique works of art, the lead time can vary greatly by design and cannot always be well predicted. We will provide our best swag as to a completion date and work to meet that date. The client must remain available to answer design questions if design issues arise.

Shipping

Initial shipping price quoted is only an estimate as the actual shipping cost is by final weight (which can vary depending on complete door design). Shipping price will be that of the actual FedEx Freight shipping cost (plus insurance) with crating charge.

Returns

Refer to the warrantee section for general return policy. In general, however, these are quite unique to the client’s ancestry and personal preferences and returns will be allowed only to alter the existing piece’s design (if possible). If we made a mistake or failed to capture the agreed to design, then a return will be accepted per the general return policy.

Tudor Entrances and Door Surrounds

Sherwood (config C)

Sherwood with Side Blocking and label moulding

Braun II (config B)

Sherwood with Coat of Arms

King & Tudor Panel Door

Standard Features

- Classic Tudor, old-world designs that compliment other products available:
 - Door surrounds that fit with Manor style doors
 - Many standard configurations that are customizable to your size requirements
- Designs drawn in CAD and approved by you and/or your architect and/or your builder
- Limestone (density at 170+ lbs / cubic foot)

- Multiple limestone types with various tones
- Hundreds of associated standard parts available to integrate to entrance – call for catalog reference

All Fireplaces	Any fireplace can be configured to be used as a doorway	See fireplaces	See fireplaces	See fireplaces

* height (H) at apex of arch

Descriptions:

- Braun: Elegant late Tudor ribbed arch (2-center) with 7" radius at the shoulder turns and a strait rise to the pointed apex. The plinth is a strait-topped piece that angles back at 45 degrees.
- Braun II: An additional 4 1/2" separate ribbed coping that extends the Braun coping
- Sherwood: Large ribbed moulding that has an integrated spandrel of carved gothic quatrefoil design. This piece works very well with label mould and side blocking. The arch is 2-center and a strait rise to the pointed apex. The plinth is a chevron topped piece that is square to the door plane.
- Henry: The Sherwood coping without spandrels. However, the arch is a complex 4-centered arch – classic Early Tudor. The arch has a less-pointed apex.
- Dorset: Heavy and wide coping (without spandrels). The arch is a 2-centered arch – classic Tudor Revival. The arch has a radius at the shoulder turns, and a strait rise to the pointed apex.

Firebox Arched Insert (normally 6 pieces, 4" thickness)	As required	As required	\$250 if standard thickness/size
Spandrel Carving Selection: Tudor Rose, English Oak Leaves, Gothic Quatrefoil, Tudor Shield and Vines, chevrons (Oxford only), or plain (no carving)	As required	As required	NC

Application

Attachment brackets are not provided. It is normal (and best) for the architect and/or builder to approve the provided detailed design view of the elevation(s), side view, and top view of the affected area. All designs are shipped in components where no single piece is longer than 48" (per cast stone standards). The fireplace and door surround can be modified on-site to fit (smaller only) for both height and width. Some slight alterations may be required at the job-site.

Lead Time

Lead time can vary due to potential order backlogs. Please inquire via phone or the website. Standard lead times run 6-8 weeks for standard parts and longer for custom parts.

Shipping

Initial shipping price quoted is only an estimate as the actual shipping cost is by final weight (which can vary depending on size required). Shipping price will be that of the actual shipping cost (plus insurance) with no prep or crating charge.

Returns

Refer to the warrantee section for general return policy. No returns on custom cast stone are permitted.

Stone Mullions

Half Mullion 4-light System

Gordon (Asymmetrical) Example - 14 sizes avail.

Gothic Window with Gordon Profile, Recessed Spandrels

Tudor 4-center, 5-Light Recessed Mullion Surround

Tudor 4-center, 3-Light Recessed Mullion Surround
With label Mouldings

Tudor 4-center, 1-Light Recessed Mullion Surround

Standard Features

- 4 Basic Profiles plus most any custom profile
- Classic recessed systems possible
- Full (transcends to interior) or half (brick depth) mullions possible
- All systems are customizable as to number of lights and height of each light
- Custom widths are possible
- Label moulding (aka: drip mould) is available for all
- Bay window systems also available (one system with stone roof)

Pricing

Pricing is by size, number of lights, type (full, half, recessed) and options (label moulding). Please call for pricing. Custom window aperture widths can be produced.

Application

Attachment hardware will be provided for all designs.

Lead Time

Lead time for hardware is 2-3 weeks for some designs. For the hardware that is made to order from England, it may take 4-12 weeks.

Shipping

Via FedEx ground. Initial shipping price quoted is only an estimate as the actual shipping cost is by final weight (which can vary depending on quantity). Shipping price will be that of the actual shipping cost (plus insurance) with no prep or crating charge.

Returns

Refer to the warrantee section for general return policy.

Our Company

We are a group of artisans based in Atlanta, Georgia that specializes in Tudor architectural elements and design. Although a small team presently, we are growing every year. Our talented federation of highly skilled artisans is comprised of 27 individuals working at the peak of their career. Our management is comprised of:

- Russell Gowan – Engineering
 - Debbie Rouleau – Production
 - David Hiers – Operations and Design
-

Our Mission

Our goal is to craft authentic reproductions that can be used with new construction or period renovations. We focus on both interior and exterior elements that tend to define and distinguish Tudor style.

If you are building or renovating a Tudor style home, contact us and we can help you. If the element you are looking for is not found on these pages, then we may know who could help you further.

Our Passion

A quote from our founder's evolving book about Tudor architecture:

"...but what was it that drew me to this seemingly antiquated design pattern? What made the style so unique and interesting? It was years later before I was fully able to completely understand the answer to these questions - as my full appreciation for this style grew slowly – maturing as I did. It grew as my knowledge about building materials and construction methodologies grew. It grew as my knowledge of history and legacy grew. Finally, my love of brick and stone – of heavy beams and massive chimneys – of steep slated roofs and planked doors – of craftsmanship and engineering - was fully realized in this wonderful thing we all know as TUDOR!"

Design and Consultation Services

We provide consultation services that can include an on-site visit to your project. Our skilled team can certainly help you obtain the authentic Tudor results you seek. Initial phone consultations are free as are most initial onsite consultations in the Atlanta area. Otherwise, we charge \$65 per hour (including travel time) - not to exceed \$300 per day. This fee is recoverable up to 10% of your total payment for products and (other) services. Extreme travel expenses may also be charged depending on the project.

Product Warrantees

We warrantee our products for 1 year against manufacturing defects. Shipping breakage does occur at times, and this must be reported immediately upon receipt of the products. You should inspect the product upon receipt and notify the shipper and Tudor Artisans within 24 hours of receipt. Otherwise, we cannot be held responsible for onsite damage or theft. Our goal is to have 100% satisfaction. If you are displeased with the products you receive then we will work with you as much as possible to ensure your satisfaction. We take great pride in our work, but at times can make mistakes due to mis-communication or misunderstanding. This will hopefully be minimized by email verifications that should be reviewed for correctness. If it is discovered that incorrect information was received by Tudor Artisans for a product order, then it will be up to the discretion of Tudor Artisans if some modification can be attempted or a return accepted. If a return is accepted in this case, then the buyer will minimally pay for crating and shipping back to Atlanta, Georgia. This is especially true for custom products that are made to order. Standard products can be returned (if not damaged in any way) at the expense of the buyer for proper crating and shipping. If the product is deemed re-sellable, then the remaining payment will be refunded via Paypal (or other acceptable mechanism). It will remain the discretion of Tudor Artisans if returned product will be replaced or remaining payment refunded.

Payment Policy

Deposit

Typical custom products require a 50% deposit (of the initial invoice total) to start the order. The order starts with initial design or the shop drawing stage. This deposit can be made via check (made out to Tudor Artisans Inc), or by most major credit cards. For very large projects, it is possible to start an order via a 25% deposit that will allow the shop drawings to be initiated. In such a case, the remaining deposit amount of 25% will be required upon drawing approval – and before fabrication will begin. In either case, the deposit is non-refundable.

If the order requires additions during the design process, it is possible to change the order accordingly. If items are wanted to be removed during the design stage, only items not yet started to be drawn can be removed. If any invoice item's actual fabrication has already begun, then removal will not be possible.

Final Payment

All invoices must be 100% paid before shipment may occur. This includes all invoice items such as shipping. Shipping charges are estimated in invoices, and actual freight charges will be ultimately charged. In the case of check final payment, the check must be received and cleared before shipment. If an invoice will be shipped in stages, only the material shipped plus shipping charges must be totally paid before shipment.
